**DETAILED ACTION**

**Status of The Claims**

Claims 1-14 have been canceled. New claims 15-17 have been added. Currently, claims 15-17 are under Examination.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15-17 are drawn to a "method of inhibiting Acetylcholinesterase by administering a compound of formula described in claim 15. The said method is indefinite because it is not clear if the said method is in vivo or in vitro. If the said method is in vivo, what are the subjects being used in the said inhibition? Moreover, the amount of the compound required in the claimed method is not indicated. Even more essential to the patentability of any enzyme-inhibition is the practical effects of the said inhibition. There is no indication of the practical effects achieved by the claimed inhibition, thus claim 15-17 are reach through claims and thus improper. What are the practical effects of inhibiting the said enzyme? Are future practical effects of the inhibition of Acetylcholinesterase included under the meaning of the claimed method?
